MAIN SCREEN

The main screen consists of the main desktop and two additional ones, on which various information is displayed. There is also the option of adding custom desktops with the ability to customize them by the number of icons and locations. This option is necessary for convenient sorting of user applications when adding them to the desktop.

There can be an unlimited number of user desktops and up to eight application icons can be placed on one desktop.

FIRST SCREEN

The first desktop displays the current date and time.
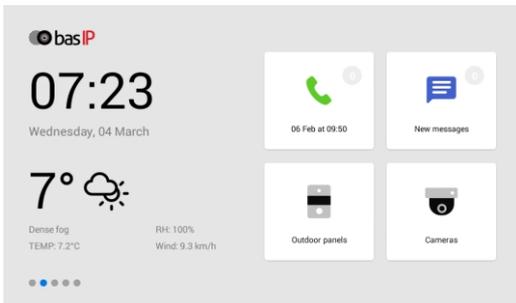

SECOND SCREEN

On the desktop are displayed:
• Date
• Time
• Weather widget
• Main sections of the monitor menu:
  • Calls
  • Messages
  • Outdoor panels view menu
  • IP cameras view menu
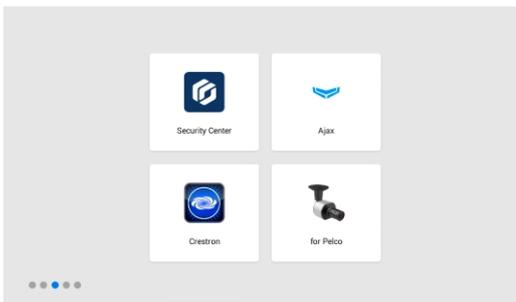

THIRD SCREEN

On the third desktop, additional system menus and applications.

It contains quad splitter.

ADDING A NEW DESKTOP AND APPS

TO ADD A NEW DESKTOP, YOU MUST:
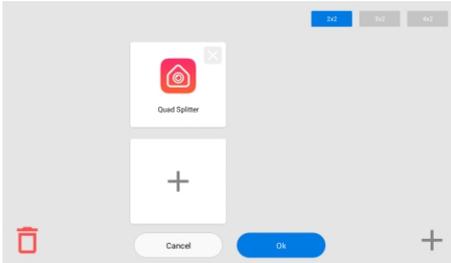

Clamp any of the icons on the additional desktop for one second, after which the desktop will go into edit mode

Click on the button to add a new desktop in the lower right corner

Select the required number of icons displayed on this desktop:
2 x 2 / 3 x 2 / 4 x 2
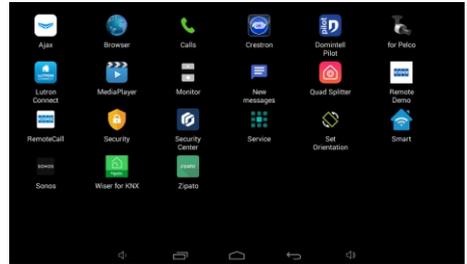

Click on the add application icon and select the necessary ones in a new window
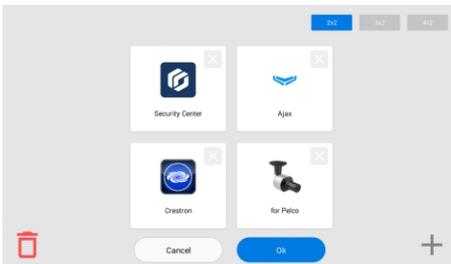

After adding the necessary applications to the desktop, you must click on the **«Ok»** button to return to normal mode.
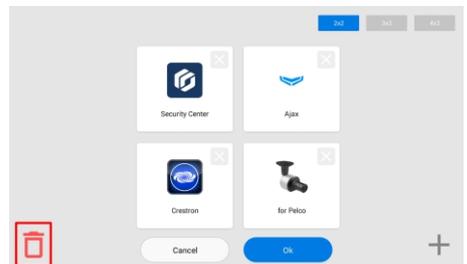

To remove the desktop, go to edit mode and click on the **«Delete»** icon in the lower-left corner.

NAVIGATION BAR
